

ANNUAL COMMONWEALTH WORKFORCE METRICS REPORT

DECEMBER 2025

COMMONWEALTH of VIRGINIA
Office of the Governor

George "Bryan" Slater
Secretary of Labor

December 17, 2025

Dear Workforce Development Partners and Stakeholders,

We are pleased to share with you the Annual Commonwealth Workforce Metrics Report for 2025, a comprehensive overview of Virginia's progress toward becoming the Top State for Talent. This report reflects the collective efforts of 64 workforce development programs across 24 agencies and 8 secretariats, all working together to build a stronger, more inclusive workforce system.

The Commonwealth Workforce Metrics Initiative was designed to foster a culture of transparency, accountability, and continuous improvement. We encourage you to use this report as a tool for reflection and strategic planning. It is **not intended to compare programs against one another, but rather to support each program in setting ambitious, yet achievable goals that align with its specific purpose and population served**. Every program plays a vital role in Virginia's workforce ecosystem, and each has been designed to meet distinct needs—from education and training to supportive services and business engagement.

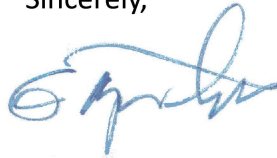

The metrics should be viewed as a catalyst for growth, not a punitive measure. They are meant to highlight progress, identify opportunities for improvement, and inform future investments. Strong performance data can serve as a compelling foundation for advocating for increased funding and support from the Virginia General Assembly, ensuring that high-impact programs have the resources they need to expand and serve more Virginians.

We are proud of the significant advancements made since the implementation of the metrics initiative. Thanks to your dedication and engagement, we have achieved a **100% response rate across** eight rounds of data collection, In fiscal year 2025, **58% of programs met or exceeded their job placement goal** and **69% met or exceeded their people trained goal**. Many programs have already demonstrated measurable growth in job placements and people trained outcomes, and we are excited to build on this momentum.

Your feedback has been instrumental in shaping the metrics framework, and we remain committed to refining and improving our approach based on your insights. As we move forward, Virginia Works will continue to provide robust support through onboarding, technical assistance, peer learning cohorts, and stakeholder engagement opportunities.

Thank you for your continued partnership and commitment to making Virginia a national leader in workforce development. Together, we are creating pathways to opportunity and ensuring that every Virginian has the tools to succeed.

Sincerely,

G. Bryan Slater

Executive Summary

Virginia Works continues to lead the Commonwealth's transformation into the Top State for Talent by building a workforce system grounded in transparency, accountability, and continuous improvement. The Commonwealth-Wide Workforce Metrics Initiative, launched in Fall 2023, is a cornerstone of this effort—establishing a consistent, outcomes-driven framework to measure the impact of workforce development programs across Virginia.

Purpose and Vision: The Metrics Initiative is designed to answer critical questions: Are Virginians finding and keeping employment? Are programs delivering a strong return on investment? Are we reducing barriers and expanding opportunity? By tracking performance across all workforce programs, Virginia Works ensures that every investment is aligned with the Commonwealth's economic mobility goals.

Building the Framework: In its first year, Virginia Works defined what qualifies as a workforce development program under Virginia Code, developed standardized metrics, and launched a uniform data collection tool. With eight successful rounds of data collection and a 100% response rate, the initiative has established a strong foundation for statewide performance measurement.

Goal Setting and Accountability: Using baseline data from the first year, Virginia Works initiated a formal goal-setting process for Fiscal Years 2025 and 2026. Programs were asked to adopt a 5% year-over-year improvement target for job placement and people trained, with flexibility to propose alternative goals. This process ensures that performance expectations are both ambitious and achievable.

Alternative Metrics: Recognizing that not all core metrics apply to every program, Virginia Works created a process for programs to propose alternative metrics that better reflect their unique goals. These metrics, collected for three quarters since, are designed to maintain a focus on outcomes while allowing for flexibility in how success is defined.

Data Collection Challenges and Recommendations: While some metrics (e.g., program costs, individuals trained) are readily available, others such as wage progression and job retention require long-term tracking that many programs are not yet equipped to support. To address these challenges, Virginia Works is working to:

1. Expanding access to the Virginia Employment Commission's Wage Match File
2. Standardizing longitudinal data collection at four key intervals
3. Removing financial barriers to data access for participating programs

Change Management and Support: Virginia Works provides structured onboarding and ongoing support to all participating programs. This includes one-on-one consultations, quarterly kickoff meetings, office hours, and regular updates through town halls and stakeholder workgroups. Virginia Works recommends hosting peer learning cohorts to share best practices and strengthen collaboration across the workforce ecosystem.

Through this initiative, Virginia Works is not only building a stronger data infrastructure; we are fostering a culture of performance, learning, and shared progress. By measuring what matters and supporting programs every step of the way, Virginia is setting a national example for how to align workforce development with real-world outcomes.

Purpose: Measuring What Matters

To become the nation’s Top State for Talent, Virginia must do more than deliver services—we must measure their impact. That’s why Virginia Works tracks workforce metrics across all programs, ensuring every investment drives meaningful outcomes for individuals, employers, and communities.

- These metrics help us answer essential questions:
- Are Virginians finding and keeping employment?
- Are our programs delivering a strong return on investment?
- Are we reducing barriers and expanding access to opportunity?

By evaluating program effectiveness over time, we can improve service delivery, allocate resources strategically, and ensure accountability to the public. The following pages outline the goals and performance metrics for each workforce development program, reinforcing our commitment to transparency and continuous improvement.

Recent legislation strengthens this commitment by requiring the Secretary of Labor to conduct annual statewide evaluations of workforce development and training programs. Legislation also charges Virginia Works with the responsibility to regularly track program metrics and establish mechanisms to assess program effectiveness (§ 2.2-2037 #5).

Measuring What Matters: The Workforce Metrics Initiative tracks not just activity, but impact: job placement, wage progression, and long-term retention.

Virginia Works has adopted a “pilot, refine, and continuously learn” approach to implementing the Commonwealth Workforce Metrics. This framework is not just about compliance; it’s also about building a culture of outcomes. Our focus is on what matters most: helping Virginians secure the right job, stay employed, and grow their earnings over time.

Importantly, not every metric applies to every program. The goal is not to compare programs, but to measure each program’s progress against its own objectives. This approach ensures that every

program, regardless of size or scope, is aligned with our shared mission: making Virginia work for everyone.

Together, these efforts create a consistent, data-informed foundation for decision-making, one that supports innovation, equity, and excellence across Virginia’s workforce ecosystem.

Commonwealth Core Metrics

Job Placement

Cost per Participant/Cost per Job Placement

People Trained

Progressed Wage Growth

Program Costs

Job Retention

Building the Foundation: The Commonwealth-Wide Workforce Metrics Initiative

Launched in Fall 2023, the Commonwealth-Wide Workforce Metrics Initiative marked a critical step in Virginia’s journey to become the Top State for Talent. The first task: define what qualifies as a workforce development program under Virginia law and identify which programs are required to report outcomes.

Defining Workforce Development in Virginia

Per § 2.2-2036 of the Code of Virginia, workforce development programs are: “Publicly funded education, training, or support service programs designed to help individuals enter or advance in a career. These may or may not lead to nondegree credentials and can be administered by Virginia Works or other agencies.”

This shared definition ensures consistency across agencies and lays the groundwork for a unified, outcomes-driven approach to performance measurement.

In Fiscal Year 2026, 64 Workforce Development Programs were part of the workforce metrics initiatives. The programs are located across 24 agencies and 8 Secretariats.

64 Workforce Development Programs across 24 agencies and 8 Secretariats

Programs to be added in Fiscal Year 2026 include Virginia Works Opportunity Advocates, Department of Energy, Skilled Pathways for Advancement, Resilience, and Knowledge (SPARK), and VEDP Virginia Internship Program.

In addition to spanning multiple secretariats and agencies across the Commonwealth, Virginia's workforce development programs are also diverse in **who they serve** and **what services they provide**. On the following page, all **64 programs** as of July 1, 2025, are categorized by their **primary purpose**:

- **Workforce Education and Training Programs**
- **Capacity Building**
- **Supportive Services**
- **Business Support Services**

Workforce Education and Training Programs: Offered by a workforce program or education provider with the goal of providing an individual with a credential leading to employment.

Capacity Building Programs: Improving the Commonwealth's capability to produce, perform, or deploy workforce development programs and services supporting individuals and businesses.

Supportive Services: Focused on providing and coordinating additional services that assist individuals in attaining employment, including transportation, housing, childcare, and other supports, as well as support in locating job opportunities, identifying workforce education and training programs, and coordinating with other services.

Business Support Services: Tailored to the talent needs of specific businesses and sectors, helping to raise awareness about career paths and job opportunities and source and fill open roles with qualified individuals that meet employers' needs.

Workforce Education & Training

- Adult Education (DOE)
- Apprenticeship (DOC)
- Career and Technical Education (DOC)
- Career and Workforce Development Center (RHEC)
- Commonwealth Cyber Initiative Career Preparedness and Experiential Learning (VIPC)
- Fiber Optic Technician Training (NCI)
- Get Skilled, Get a Job, Get Ahead "G3" (VCCS)
- Hampton Roads Skilled Trades Rapid On-ramp Network for Growth (Virginia Works)
- New Economy Workforce Credential Grant (SCHEV)
- Postsecondary Career and Technical Education (VCCS)
- Registered Apprenticeship (IALR)
- Registered Apprenticeship (Virginia Works)
- Secondary CTE - Perkins (DOE)
- Supplemental Nutrition Assistance Program Employment and Training (DSS)
- Trade Adjustment Assistance (Virginia Works)
- Virginia Initiative for Education and Work (DSS)
- Virginia Initiative for Education and Work (DSS)
- Virginia Rural Information Technology Apprenticeship Grant Fund and Program (SWVHEC)
- Virginia Space Grant Consortium Internship Programs
- Virginia Talent + Opportunity Program (SCHEV)
- Vocational Rehabilitation Program (DARS)
- Vocational Rehabilitation Program (DBVI)
- Waterman's Apprentice Program (VMRC)
- Work Certifications (DOC)
- Workforce Development Grant Program (DRPT)
- Workforce Development Initiative (DJJ)
- Workforce Innovation and Opportunity Act Adult (Virginia Works)
- Workforce Innovation and Opportunity Act Dislocated Worker (Virginia Works)
- Workforce Innovation and Opportunity Act Youth (Virginia Works)
- Workforce Training Programs (SVHEC)

Capacity Building

- Advanced Manufacturing Talent Investment Program and Fund Pilot (VEDP)
- Appalachian Regional Commission (DHCD)
- Commonwealth Cyber Initiative (VIPC)
- Earn to Learn Nursing Education Acceleration Program (VDH)
- Growth and Opportunity Fund – "GO Virginia" (DHCD)
- Institutes of Excellence for Non-Credit Training and Instruction (VCCS)
- Virginia Nursing Scholarship Programs (for CNAs, nurse educators, LPN, RN, NP) (VDH)
- Virginia Nurse Preceptor Incentive Program
- Virginia Loan Repayment Programs for Healthcare Jobs
- Virginia J-1 Waiver Programs (VDH)
- Work Opportunity Tax Credit (VA Works)
- Workforce Development & Training Fund (VCEDA)

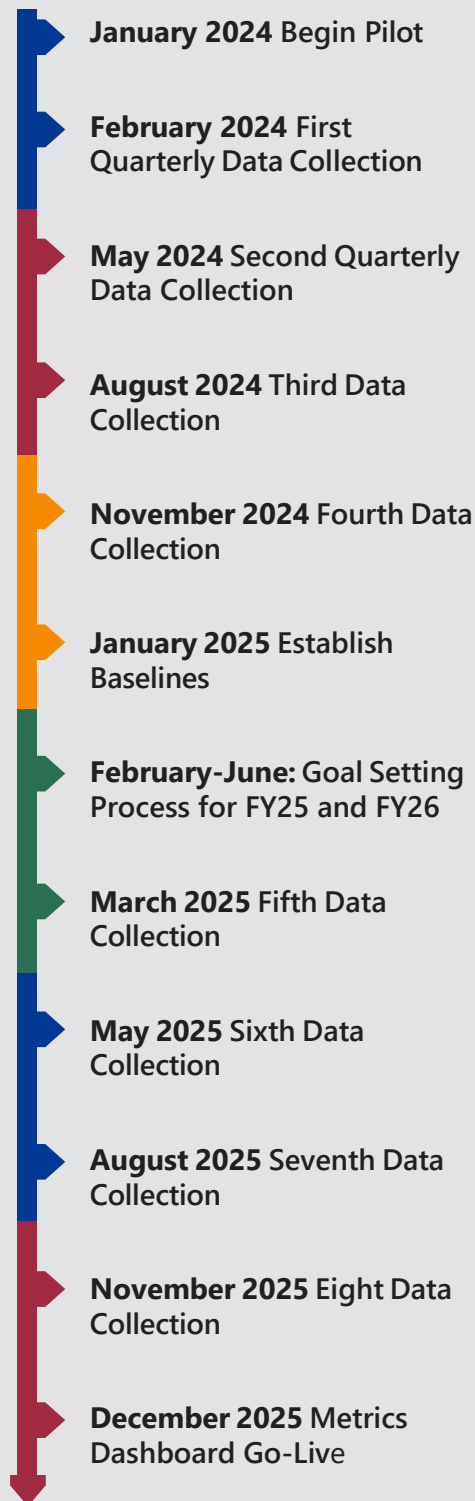

Support Services

- Employment Service Program (Virginia Works)
- Family Engagement Services (DSS)
- Jobs for Veterans (Virginia Works)
- Migrant and Seasonal Farmworkers (VA Works)
- Military Education & Workforce Initiative (DVS)
- Military Medics and Corpsman Program (DVS)
- Rapid Response (Virginia Works)
- Reemployment Services and Eligibility Assessment (Virginia Works)
- Refugee Support Services Program (DSS)
- Senior Community Service Employment Program (DARS)

Business Support Services

- Foreign Labor Certification (VA Works)
- Talent Accelerator Program (VEDP)
- Tech Talent Investment (VEDP)
- Virginia Jobs Investment Program (VEDP)
- Virginia Values Veterans (DVS)

TIMELINE

From Framework to Action

By January 2024, Virginia Works had developed a standardized set of metrics, operational definitions, and a uniform data collection tool. In February, the first quarterly data collection cycle launched. Since then, eight rounds of data collection have been completed, with a **100% response rate from participating programs**. This early success reflects the strength of Virginia's cross-agency collaboration and the commitment of partners across the workforce ecosystem.

100%
response rate
for **8** cycles.

Core Metrics Definitions

- 1. Job Placements:** Total new job placements after exit from a program during the given state fiscal year quarter or total jobs created during the given state fiscal year.

- 2. Individuals Trained:** Total participants who successfully completed training and/or received certification during the given state fiscal year quarter.

- 3. Program Costs:** Total reportable program expenditures for the given state fiscal year quarter.

- 4. Cost Per Participant or Cost Per Job Placement:** Program costs divided by the number of participants or divided by the number of job placements.

- 5. Progressed Wage Growth:** The percent change of a participant's quarterly wages at program entry compared to their quarterly wages six months after program completion.

- 6. Job Retention:** Percentage of individuals that are in a job within six months of program completion and remain in a job twelve months after program completion.

Metric Relief Requests

To ensure fairness and feasibility, Virginia Works allows programs to request relief from reporting specific metrics. These requests must include written justification and are reviewed in consultation with the Secretary of Labor. The intent is not to avoid difficulty, but to ensure that metrics align with each program's scope and capabilities.

Most relief requests stem from two common barriers:

- Limited access to wage and employment data systems
- Insufficient infrastructure to track long-term outcomes

Because two of the measures—progressed wage growth and job retention—are long-term in nature, programs will need adequate time to phase them in. Virginia Works is committed to addressing these challenges through targeted policy and system improvements. The table on the following pages outlines the core metrics each program was requested to report for FY25. As the workforce metrics and data collection processes mature, programs that were initially granted relief from reporting long-term measures will be required to do so. This requirement will be determined by the Secretary of Labor, who holds the authority to mandate compliance with performance measures for all workforce development program administrators and providers across state government, in accordance with the Code of Virginia §2.2-214.3.

Fiscal Year 2025 Required Metrics of Each Workforce Development Program

Program Reporting Status – Fiscal Year 2026

In Fiscal Year 2026, 35 programs (57%) successfully reported all required metrics. An additional 20 programs (31%) reported at least half of their required metrics.

Four programs reported at least one metric, but less than half of their required metrics:

- DVS Military Education and Workforce Initiative
- DVS Military Medics and Corpsman Program
- DVS Virginia Values Veterans (V3)
- SCHEV Virginia Talent + Opportunity Program (V-TOP)

Two programs were unable to report data due to being newly established or recently onboarded to the Workforce Metrics Initiative:

- Appalachian Regional Commission (ARC)
- Earn to Learn Nursing Education Acceleration Program

Additionally, two programs administered by the Virginia Department of Health (VDH) reported no activity during the reporting period:

- ARC J-1 Waiver Program (no applicants)
- Nurse Educator Scholarship Program (no scholarships awarded)

Metrics That Are Readily Reported

Several core metrics are consistently reported across programs, as they are typically captured through existing administrative systems:

- Number of individuals trained
- Program costs and cost per
- Job placements

These metrics form the foundation of performance reporting and provide a clear picture of program reach and investment. Of the programs that are required to report the number of individuals trained, 91% have reported data. Of the programs that are required to report job placements, 87% have reported data. Of the programs that are required to report program costs, 89% have reported the metric and 91% have been able to report program cost per participant or job placement.

Metrics That Require Additional Capacity

Other metrics, particularly those that track long-term outcomes, present greater challenges:

- Wage progression over time
- Job retention at 6 and 12 months post-exit

These indicators require programs to follow participants beyond program completion, which many currently lack the systems, data access, or capacity to do effectively. Of the programs that are required to report progressed wage growth 57% have provided data for this metric. Of the programs required to report job retention, 46% have been able to report this metric.

Advancing Data Collection

To enhance participation and improve the quality of workforce metrics reporting, **Virginia Works is actively connecting workforce development programs to available data sources.** We have shared our experience using Virginia Employment Commission (VEC) Wage Match Records as a method for collecting workforce metrics and have facilitated connections between other programs and the VEC to explore similar opportunities.

However, there are challenges to using VEC records. Programs must collect participants' Social Security numbers, and access to these records involves fees that some agencies consider cost-prohibitive. **Cost should not be a barrier to compliance.** Reducing or eliminating these fees would improve participation, data quality, and equity across programs of all sizes.

Virginia Works and VEC are also collaborating on an **unemployment insurance enhancement project** that will add new data fields, enabling calculation of hourly wage rates. This will allow programs to compare participants' wages before program entry and after program exit. These enhancements are expected to be completed in 2026.

Finally, Virginia Works is working to **engage newly identified workforce development programs earlier in their planning process.** By onboarding programs to workforce metrics requirements before implementation and identifying key data collection intervals—program entry, program exit, six months post-exit, and twelve months post-exit—we position new programs to report workforce outcomes more effectively.

By addressing these challenges and implementing these strategies, **Virginia can strengthen its data infrastructure, improve transparency, and ensure that every workforce development program measures what matters most: long-term outcomes for Virginians.**

Goal Setting: Turning Data into Direction

With a full year of baseline data collected, Virginia Works launched a formal goal-setting process to drive continuous improvement across the Commonwealth's workforce development programs. This process ensures that performance targets are grounded in real data—and that every program is working toward measurable, meaningful outcomes.

Establishing Baselines and Setting Ambitious, Achievable Goals

In Fiscal Years 2025 and 2026, Virginia Works—working in close partnership with the Secretary of Labor—introduced annual performance goals for two core metrics:

- **Job Placement**
- **People Trained**

Each program's baseline data served as the starting point. From there, Virginia Works proposed a 5% year-over-year increase to encourage steady progress while accounting for program size, scope, and capacity.

Programs were invited to:

- Accept the proposed goals, or
- Submit alternative targets with a written justification.

All alternative submissions were reviewed by the Secretary of Labor, who made final determinations to ensure alignment with statewide priorities and statutory requirements.

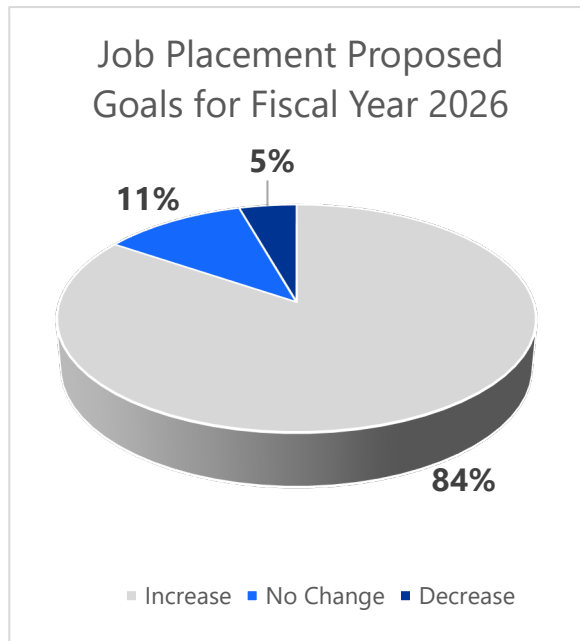

From Data to Direction:
Virginia Works launched a formal goal-setting process using real baseline data to drive measurable improvement across the workforce system.

Job Placement Goal Status – Fiscal Year 2026

Of the 48 programs that have established a job placement goal for Fiscal Year 2026, 83% set a goal that reflects an increase over the prior year.

Among the 59 programs required to report on job placement or jobs created:

- 48 programs have established formal goals
- 6 programs are still in the process of establishing baseline data before goals can be set
- 3 programs that report on job creation have proposed alternative metrics (e.g., number of businesses served)
- 2 programs are in sunset status and were not required to establish a goal

People Trained Goal Status – Fiscal Year 2026

Of the 37 programs that have established a goal for Fiscal Year 2025, 88% have proposed growth goals compared to the previous year.

Among the 43 programs required to report on the People Trained metric:

- 37 programs have established formal goals
- 4 programs are still in the process of establishing baseline data
- 2 programs were excused from setting a goal due to being in sunset status

Advancing the Workforce Metrics Process

To support workforce development programs in the goal-setting process, Virginia Works has established a timeline for the upcoming cycle and communicated it to all program owners. Additionally, the 2026 data collection windows have been shared well in advance, and the reporting schedule has been adjusted to align with federal requirements. A consistent timeline enables programs to plan strategically, allocate resources effectively, and align internal performance management systems with statewide expectations. By setting clear, data-informed goals and aligning them with labor market realities, Virginia Works is helping programs move from measurement to momentum—ensuring that every investment in workforce development delivers real results for Virginians.

Data Collection Timeline for 2026

| <u>Quarter</u> | <u>Data Collection Window</u> | <u>Other Workforce Metric Engagement</u> |
|---------------------|------------------------------------|--|
| Q1 July-September | December 16, 2025-January 16, 2026 | Update Workforce Ecosystem Catalog |
| Q2 October-December | February 17, 2026-March 13, 2026 | None |
| Q3 January-March | May 1, 2026-May 29, 2026 | Workforce Metrics Goal Setting |
| Q4 April-June | October 1, 2026-October 30, 2026 | Set Annual Timeline for 2027 |

Alternative Metrics: Flexibility with Accountability

Virginia Works recognizes that a one-size-fits-all approach to performance measurement doesn’t reflect the diversity of programs across the Commonwealth’s workforce ecosystem. To ensure that evaluation remains meaningful and aligned with each program’s purpose, a formal process was established, developed in consultation with the Secretary of Labor, to allow programs to propose alternative metrics.

Why Alternative Metrics Matter

The goal of alternative metrics is not to replace rigor, but to enhance relevance. These metrics are designed to:

- Reflect what success looks like within a program’s unique context
- Maintain a focus on outcomes, not just activities
- Align measurement with program intent, particularly for initiatives focused on economic development, employer engagement, or systems change.

Not One-Size-Fits-All:
Alternative metrics allow programs to define success in ways that reflect their unique goals-while maintain a focus on outcomes

Importantly, alternative metrics are not intended to substitute for essential long-term outcomes such as job retention or wage progression. These remain critical to understanding impact and must be pursued wherever feasible.

Alternative metrics have been collected for three consecutive quarters and are not yet displayed on the public-facing dashboard.

Programs interested in proposing an alternative metric may do so by contacting Virginia Works. Each request must include:

- The name of the proposed metric
- A clear operational definition
- A justification explaining how the metric reflects a meaningful outcome
- An indication of whether the metric is intended to supplement or replace a core metric

This process ensures that flexibility does not come at the expense of accountability, and that every program, regardless of its structure or focus, is contributing to a shared vision of workforce excellence in Virginia.

The table below identifies the programs and alternative metrics that have been established.

| Agency and Program Name | Alternative Metrics | Data Reported to Date | |
|---|--|------------------------|---------|
| DOE Adult Education | Measurable Skills Gain | Data not yet available | |
| DSS Family Engagement Services | Percent Employed and Paying Child Support | 2025 Q2 | 13% |
| | | 2025 Q3 | 11% |
| | | 2025 Q4 | 9% |
| DSS Family Engagement Services | Increase Percentage of previously justice-involved employed and paying child support | 2025 Q2 | 22% |
| | | 2025 Q3 | 20% |
| | | 2025 Q4 | 19% |

Change Management and Capacity Building

Virginia Works understands that successful implementation of the Commonwealth-Wide Workforce Metrics Initiative requires more than compliance; it requires support, collaboration, and shared learning. That's why every program identified to participate receives structured onboarding and ongoing engagement designed to build capacity and foster a culture of continuous improvement.

Onboarding: Setting the Stage for Success

The onboarding process begins with a one-on-one consultation between Virginia Works and the workforce development program team. During this session, the Virginia Works Workforce Outcomes Coordinator:

- Reviews the purpose and goals of the Workforce Metrics Initiative
- Explains the operational definitions of each required metric
- Outlines data collection procedures, timelines, and expectations
- Requests the designation of a Program Owner and a Data Owner

Each program is also asked to complete a one-page summary that identifies:

- What the program does
- Who it serves
- Where it operates
- How it achieves results
- Why it matters

This summary becomes part of the Workforce Ecosystem Catalog, a living document updated annually and shared with partners and stakeholders. The catalog has become a valuable tool for program leaders to discover peer programs, identify potential collaborators, and strengthen cross-agency alignment. The Workforce Ecosystem Catalog is available online at: <https://virginiaworks.gov/wp-content/uploads/2025/07/Ecosystem-Map-Living-Document-with-Program-Slides-July-2025.pptx>

Ongoing Support and Engagement

Virginia Works maintains continuous engagement with participating programs through a structured support model that includes:

- **Quarterly kickoff meetings** at the start of each data collection cycle
- **Office hours** (minimum of two per cycle) to provide real-time technical assistance
- **Regular updates** through:
 - Bi-monthly Commonwealth-Wide Town Halls
 - Quarterly meetings of the Virginia Board of Workforce Development

Office hours provide timely, hands-on support for program and data owners. Just as importantly, they serve as a two-way learning opportunity, allowing Virginia Works to hear directly from the field and adapt support accordingly. This model ensures that programs are not only equipped to meet reporting requirements, but also empowered to use data as a tool for learning, improvement, and impact.

Strengthening Support Through Peer Learning

To further enhance the change management process and build a stronger statewide workforce network, Virginia Works will facilitate peer learning groups. **In 2026 Virginia Works plans to** host peer learning sessions or cohort-based meetings for programs with similar goals, challenges, or service models. Creating intentional spaces for programs to share best practices, lessons learned, and innovative solutions will improve data quality, foster collaboration, and strengthen the workforce ecosystem as a whole.

The first peer learning cohorts planned for 2026 are for work-based learning programs (e.g., internships, cooperative education, or registered apprenticeships) as these programs often face unique challenges in measuring job placement. For these programs, success may mean immediate job placement, or returning to a degree or credential program.

Analysis

Because programs vary in purpose, target populations, and the types of workforce barriers their participants face, programs should not be compared against one another. Instead, each program should be evaluated against its own progress over time. It is also important to note that individuals may be served by more than one program at a time, therefore data should not be summed across programs to calculate the total number of Virginians that have been placed in a job or have completed training. Reviewers should note that two data points do not establish a trend. As additional data is collected, more robust evaluations will be possible.

Job Placements: In Fiscal Year (FY) 2025, 22 out of 38 programs (58%) that had established a baseline and set a goal for job placements met or exceeded their targets. This marks a continued effort toward improved outcomes across the Commonwealth’s workforce initiatives.

The table below highlights programs that reported the greatest percentage increases in job placements compared to FY 2024. While these gains reflect strong program performance, part of the increase may also be attributed to enhanced data collection and reporting practices as the workforce metrics initiative continues to mature.

Programs reporting strong Job Placement Growth

| Program | FY 2024 Actual | FY 2025 Actual | Percent Change |
|--|----------------|----------------|----------------|
| Virginia Rural Information Technology Apprenticeship Grant Fund and Program (SWVHEC) | 4 | 36 | 800% |
| Workforce Development and Training Fund (VCEDA) | 36 | 137 | 281% |
| Virginia Values Veterans (DVS) | 5,645 | 19,499 | 245% |
| Growth and Opportunity Fund (DHCD) | 281 | 918 | 227% |
| Reemployment Services and Eligibility Assessment (RESEA) | 1,653 | 3,072 | 86% |
| Workforce Development Initiative (DJJ) | 38 | 66 | 74% |
| Nursing Preceptor Incentive Program (VDH) | 360 | 586 | 63% |
| Rapid Response (Virginia Works) | 276 | 353 | 28% |
| Registered Apprenticeship (Virginia Works) | 4,098 | 5,154 | 26% |
| New Economy Workforce Credential Grant (SCHEV) | 942 | 1,146 | 22% |
| Workforce Innovation and Opportunity Act – Youth (Virginia Works in partnership with Local Workforce Development Boards) | 521 | 624 | 20% |
| Secondary CTE – Perkins (DOE) | 8,488 | 10,041 | 18% |

People Trained: In Fiscal Year (FY) 2025, 20 out of 29 programs (69%) that had established a baseline and set a goal for People Trained met or exceeded their targets. This marks a continued effort toward improved outcomes across the Commonwealth’s workforce initiatives.

The table below highlights programs that reported the greatest percentage increases in training completions compared to FY 2024. While these gains reflect strong program performance, part of the increase may also be attributed to enhanced data collection and reporting practices as the workforce metrics initiative continues to mature.

Programs reporting strong People Trained Growth

| Program | FY 2024 Actual | FY 2025 Actual | Percent Change |
|--|----------------|----------------|----------------|
| Virginia Space Grant Consortium Internship Programs | 44 | 131 | 198% |
| Nursing Preceptor Incentive Program (VDH) | 1,052 | 2788 | 165% |
| Get Skilled, Get a Job, Give Back Innovation and Program Grants (VCCS) | 5,330 | 9086 | 70% |
| New Economy Workforce Credential Grant (SCHEV) | 12,795 | 21,558 | 68% |
| Adult Education (DOE) | 1,453 | 2375 | 63% |
| Supplemental Nutrition Assistance Program Employment and Training (DSS) | 349 | 483 | 38% |
| Virginia Initiative for Education and Work (DSS) | 792 | 1071 | 35% |
| Postsecondary Career and Technical Education (DOC) | 25,114 | 33793 | 35% |
| Virginia Rural Information Technology Apprenticeship Grant Fund and Program (SWVHEC) | 48 | 62 | 29% |
| Registered Apprenticeship (Virginia Works) | 1,444 | 1,806 | 25% |

Programs Costs and Cost Per Participant

Programs were asked to report their total program costs, which include all operating expenses such as:

- Direct costs to participants
- Staffing costs required to operate the program
- Administrative and overhead expenses

Programs were instructed to include all sources of funding, not just state or federal contributions, when calculating their total costs.

The table below presents the total reported program costs for FY 2025, along with the median and average cost per participant. It is important to note that cost per participant can vary significantly across programs due to factors such as:

- Initial investments required to launch new programs
- The intensity of services provided
- The complexity of needs among participants, particularly those facing multiple barriers to employment

Please note: The Work Opportunity Tax Credit Program and Student Loan Repayment Programs are reported separately in the table below.

Program Costs and Cost Per Participant

| Program | Metric | FY 2025 | Cost Per Participant |
|--|--|---------------|-------------------------------------|
| All other programs | | \$293,248,916 | \$1,502 median \$3,496 average |
| Work Opportunity Tax Credit (Virginia Works) | Value of certified tax credits to businesses | \$128,720,600 | \$2,906 median \$2,906 average |
| Student Loan Repayment Programs (VDH) | Value of loan repayment | \$2,816,032 | \$24,612 median \$24,716 average |

Progressed Wage Growth: The Progressed Wage Growth metric was originally designed to measure the percentage change in quarterly earnings from program entry to six months after program exit. However, several data-related challenges—particularly the lack of access to hourly wage information—have made accurate measurement difficult. Virginia is actively working to enhance the UI Wage Match system, which will enable the Commonwealth to track hourly wage progression more effectively. Looking ahead, the Commonwealth envisions not only capturing initial wage progression from program entry to employment at exit, but also monitoring long-term wage trends to better understand the sustained impact of training programs. Implementation of the Progressed Wage Growth measure is currently on hold until the UI system enhancements are completed, which is anticipated by mid-2026

Job Retention: The original intent of the Job Retention metric was to measure the percentage of individuals who remained employed one year after exiting a program. However, in Year 1 of the workforce metrics initiative, the metric was calculated by comparing the number of individuals placed into jobs in the current year to those placed the previous year. This method often produced percentages exceeding 100% and did not measure individual job retention. Instead, it reflected program growth or decline, influenced by factors such as:

- Economic conditions
- Cohort size and composition
- Type of training provided
- Participant barriers and prior experience

Additionally, the metric compared job placements in the current quarter to those from a cohort 12 months prior, further distancing the measure from its original intent.

In Year 2, the metric was refined to track individual job retention over time, aligning more closely with its intended purpose. As a result, the Job Retention metric is currently displayed only for FY 2025 on the Workforce Metrics Dashboard. ,

Conclusion

The 2025 Annual Commonwealth Workforce Metrics Report reflects a pivotal year in Virginia's journey to become the Top State for Talent. Through the Commonwealth-Wide Workforce Metrics Initiative, Virginia Works has laid a strong foundation for data-driven decision-making, accountability, and continuous improvement across the workforce ecosystem.

This year's report demonstrates that programs across the Commonwealth are not only embracing performance measurement but are also using data to drive meaningful change. With 100% participation in eight rounds of data collection, a majority of programs meeting or exceeding their goals, and the successful implementation of both core and alternative metrics, Virginia is setting a national standard for workforce transparency and impact.

At the same time, the report highlights areas where further investment and collaboration are needed—particularly in tracking long-term outcomes like wage progression and job retention. Virginia Works remains committed to addressing these challenges through expanded data access, standardized reporting intervals, and peer learning opportunities.

As we look ahead to 2026 and beyond, the Commonwealth's workforce system is better equipped than ever to align services with outcomes, ensure equitable access to opportunity, and deliver a strong return on investment for Virginians. By continuing to measure what matters and support programs every step of the way, Virginia is not just building a stronger workforce—it is building a stronger future.

Appendix Overview: Commonwealth Workforce Metrics Dashboard

The appendix provides a snapshot of the data currently available on the Commonwealth Workforce Metrics Dashboard. All data presented in this report reflects submissions received from program owners as of November 30, 2025. Because programs vary in purpose, target populations, and the types of workforce barriers their participants face, programs should not be compared against one another. Instead, each program should be evaluated against its own progress over time.

Data Availability and Reporting Frequency

Programs have been on-boarded to the Workforce Metrics Initiative over the past two years.

As a result:

- Some programs have submitted eight quarters of data
- Others, particularly those that report annually, may have only one data point available

Reviewers should note that two data points do not establish a trend. As additional data is collected, more robust evaluations will be possible.

Commonwealth Workforce Metrics Dashboard Legend

Program achieved the goal it established for Fiscal Year 2025

Program did not achieve goal for Fiscal Year 2025, however, the program showed progress

Program did not achieve goal for Fiscal Year 2025, but maintained performance

Program declined from initial baseline year

SAMPLE

| DARS Senior Community Service Employment Program | | |

| Program Purpose | | What to Know About the Data |
| GO Virginia supports programs that create more high-paying jobs through incentivized collaboration between business, education, and government to diversify and strengthen the economy in every region of the Commonwealth. Capacity-building funds assist regional councils in building capacity for job creation and program implementation. Per capita project grants allocated to each region on a per capita basis for projects of regional significance, competitive grants awarded for projects of statewide economic impact and interregional collaborations | | Program Cost Per Job Placement is an annual calculation based on case service dollars spent on job placement outcomes. |

DJJ Workforce Development Initiative

| Percent of Required Metrics Reported | Job Placement FY2025 | People Trained FY2025 |
|--|----------------------|---|
| 67% | ★ | 📌 |
| Program Purpose | | What to Know About the Data |
| As part of its evidence-based transformation, the Virginia Department of Juvenile Justice (DJJ) is committed to expanding reentry vocational programs, workforce development, and mentoring to support youth returning to their communities. Central to this effort is the Workforce Development Initiative (WDI), which established the Workforce Development Center at Bon Air JCC and complementary Community Engagement and Business Development tracks. These programs offer workplace readiness training, trade certifications (e.g., electrical, HVAC, plumbing), apprenticeships, and connections to employment and wraparound services. | | Because youth in DJJ are released at different times, data on job retention and wage growth can't always be tracked consistently. |

DOC Apprenticeship

| Program Purpose | | What to Know About the Data |
| <p>The Apprenticeship program is a collaboration between Continuing Technical Education (CTE) Program instruction and workforce programming for those enrolled in a registered Virginia Works apprenticeship program. The Apprenticeship programs for VADOC utilizes workforce training in collaboration with trade knowledge to provide students with critical skills in construction trades, barbering, cosmetology, culinary arts and other careers for life changing opportunities. All programs are registered with Virginia Works and for those trades applicable opportunities to be licensed through Department of Professional and Occupational Regulation (DPOR).</p> | | <p>Job placements, progressed wage growth, and job retention rates reflect inmates who were released from incarceration who completed an apprenticeship program at some point during their release term of incarceration. They may have completed other Career and Technical Education or Work certification programs and are included in those metrics, if applicable. All employment metrics reflect inmates released the quarter prior to the one indicated who were employed during the quarter indicated. People trained reflect inmates who completed the course during the identified quarter. Total program cost reflect annual cost for all apprenticeship programs divided by four. Inmates in apprenticeship programs are required to hold a prison job in their area of training and therefore DOC receives some offset cost and benefits from their work during training. All data is as of the time of submission, as additional data is entered, results may change.</p> |

| Program Purpose | What to Know About the Data | |
| Adult education providers across the commonwealth serve youths and adults with or without a high school credential who have foundational and employability skill needs. Learners are prepared for further education, training, and career advancement, and parents are assisted to become more involved in their children's education. Those who earn a secondary or industry-recognized credential can see significant wage progression. Services are offered at no- or low-cost in cooperation with education and workforce development partners. | This program is reporting an alternative metric "Measurable Skills Gain". For FY2025, 21,083 Measurable Skills Gains were reported. Adult Education Title II does data matching and financial reporting annually; data cannot be reported with accuracy by quarter. This reflects the annual data submitted to the U.S. Department of Education for PY2024-2025. Total number of participants was 19,060. The number of participants in integrated education and training (IET) cohorts which lead to an industry-recognized credential was 2,617, or 13.7%; IET participants' employment rate in the second quarter after exit was 58.65%. | |

| <p>The Virginia Talent + Opportunity Partnership (V-TOP) serves two primary purposes as outlined in the statute: (i) to expand paid and credit-bearing student internships and other work-based learning opportunities in collaboration with Virginia employers; and (ii) to facilitate the readiness of students, employers, and institutions of higher education to participate in internship and work-based learning.</p> | | <p>Overall, the data is sourced from SCHEV's credit-bearing report and grants from institutions. These reports do not consistently align with the quarterly reporting structure; therefore, annual reporting is the most effective approach for providing comprehensive outcome information.</p> |

SVHEC Workforce Training Programs

| Percent of Required Metrics Reported | Job Placement FY2025 | People Trained FY2025 |
|---|----------------------|---|
| 67% | ★ | ★ |
| Program Purpose | | What to Know About the Data |
| Southern Virginia Higher Education Center Workforce Training prepares students for success in high-demand occupations. Information Technology, Welding, and HVAC programs are developed with input from employers and use nationally recognized curricula. Students earn industry certifications and may earn college credit through partnerships with Southside Virginia Community College and Danville Community College. The Workforce Training team also develops and delivers customized training to meet specified needs of employers. SVHEC Workforce Training students fill the workforce needs of employers in Southern Virginia and beyond. | | As a workforce training provider, the Southern Virginia Higher Education Center connects students with employers but training services do not include job placement. Surveys of program completers have low response rates, so employment information is incomplete. Job Placement numbers reported are based on available data, but are likely lower than actual results due to incomplete information. This also impacts Cost Per Job Placement, which is likely lower than reported. In FY 2025, we signed a data-sharing agreement with the Virginia Employment Commission to improve accuracy of reported Job Placements and Cost Per Job Placement in the future. |

SWVHEC Virginia Rural Information Technology Apprenticeship Grant Fund and Program

| Percent of Required Metrics Reported | Job Placement FY2025 | People Trained FY2025 |

| Program Purpose | What to Know About the Data | |
| The Tech Talent Investment Program (TTIP), launched in 2019, is a historic \$1.1 billion, 20-year investment in Virginia’s tech talent pipeline. TTIP was conceived as part of Virginia’s 2018 winning proposal to Amazon for HQ2. Participating institutions have set goals to increase the number of BS and MS graduates in Computer Science and related fields by at least 30,000 over 20 years. Thirteen institutions and the Virginia Community College System participate in TTIP as of FY25. | TTIP degree counts are available in September of each year. Awards are calculated in the fall and disbursed in December. An annual report is due December 1st. TTIP has been undergoing a revision process since January 2024. This program is only reporting on program expenditures and an alternative metric of the number of additional degrees in Computer Science and related fields beyond 2018. The following metrics are not applicable to this program: Job Placement, People Trained, Program Cost per Participant, and Job Retention. | |
